GSA schedules give quick access to consultants pre-qualified by the General Services Administration. You can sole-source a GSA order if it is below the micro-purchase threshold of \$10,000 inside the United States, with documentation of the circumstances if it is between \$10,000 and the simplified acquisition threshold of \$250,000 inside the United States, or with a limited-sources justification if it exceeds the \$250,000 threshold. An order exceeding the \$250,000 threshold or a blanket purchase agreement requires that you distribute an RFQ to multiple schedule contractors as practicable, typically through the GSA eBuy system, in order to receive at least three quotes on the RFQ.

Regarding limited sources justification, the justification must be approved by the competition advocate if the value exceeds \$700,000 and must be approved by the head of the procuring activity if the value exceeds \$13,500,000. Ordering agencies do not have to synopsise orders and BPAs in betaSAM.gov unless they use a limited sources justification.

For help with procurements through Gannett Fleming's GSA schedules, contact Federal Program Administrator, Kate Berrigan, 703-277-9505, kberrigan@gfnet.com.
